

## iF488 Anti-Mouse CD45.2 Antibody

|                           |                     |
|---------------------------|---------------------|
| <b>Catalog Number:</b>    | 202303, 202304      |
| <b>Size:</b>              | 25 tests, 100 tests |
| <b>Target Name:</b>       | CD45.2, Ly-5.2, LCA |
| <b>Regulatory Status:</b> | RUO                 |

### PRODUCT DETAILS

---

|                               |                                                                                                                                                                                                                                                                                             |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Clone:</b>                 | 104                                                                                                                                                                                                                                                                                         |
| <b>Application:</b>           | Flow Cytometry                                                                                                                                                                                                                                                                              |
| <b>Reactivity:</b>            | Mouse                                                                                                                                                                                                                                                                                       |
| <b>Format:</b>                | iF488                                                                                                                                                                                                                                                                                       |
| <b>Isotype:</b>               | Mouse IgG2a                                                                                                                                                                                                                                                                                 |
| <b>Antibody Type:</b>         | Monoclonal                                                                                                                                                                                                                                                                                  |
| <b>Formulation:</b>           | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA                                                                                                                                                                                                       |
| <b>Protein Concentration:</b> | Supplied at a lot-specific concentration.                                                                                                                                                                                                                                                   |
| <b>Storage&amp;Handling:</b>  | The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.                                                                                                                                                        |
| <b>Recommended Usage:</b>     | For flow cytometric staining, it is recommended to use 5 µL of this reagent per 0.5-1.0 million cells in a 100 µL volume. Optimal reagent performance should be determined by titration for each specific application. iF488 has an excitation max at 491 nm and an emission max at 516 nm. |
| <b>Isotype Control:</b>       | 301505                                                                                                                                                                                                                                                                                      |
| <b>RRID:</b>                  | AB_3739085                                                                                                                                                                                                                                                                                  |

### BACKGROUND INFORMATION

---

CD45.2 is a mouse alloantigen variant of CD45, expressed by Ly5.2-bearing mouse strains (e.g., A, AKR, BALB/c, CBA/Ca, CBA/J, C3H/He, C57BL, C57BR, C57L, C58, DBA/1, DBA/2, NZB, SWR, 129). CD45 is a 180–240 kDa receptor-type protein tyrosine phosphatase (PTP) expressed on all hematopoietic cells except mature erythrocytes and platelets. CD45.2 plays a crucial role in immune cell signaling, lymphocyte development, and activation.

## PRODUCT DATA

Mouse splenocytes stained with either iF488 Anti-Mouse CD45.2 clone104 (color-filled histogram) or an isotype control (gray histogram).

This product is supplied subject to the terms and conditions at [www.innocyto.com/web/terms.php](http://www.innocyto.com/web/terms.php) and may only be used as provided in the stated terms. Products are for Research Use Only.
