|                               |                                                                                                                                                       |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Clone:</b>                 | MOPC-173-Hamster                                                                                                                                      |
| <b>Application:</b>           | Flow Cytometry                                                                                                                                        |
| <b>Reactivity:</b>            | N/A                                                                                                                                                   |
| <b>Format:</b>                | iF647                                                                                                                                                 |
| <b>Isotype:</b>               | Armenian Hamster IgG                                                                                                                                  |
| <b>Antibody Type:</b>         | Monoclonal                                                                                                                                            |
| <b>Formulation:</b>           | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA                                                                 |
| <b>Protein Concentration:</b> | 0.2mg/mL                                                                                                                                              |
| <b>Storage&amp;Handling:</b>  | The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.                  |
| <b>Recommended Usage:</b>     | Use at concentrations comparable to those used for the target-specific antibody. iF647 has an excitation max at 656 nm and an emission max at 670 nm. |
| <b>Excitation Laser:</b>      | Red Laser (633 nm)                                                                                                                                    |

### BACKGROUND INFORMATION

---

This antibody was chosen as an isotype of armenian hamster control after screening on a variety of resting, activated, live, and fixed mouse, rat and human tissues.

## PRODUCT DATA

---

Human peripheral blood lymphocytes was stained with iF647 Armenian Hamster IgG Isotype control (gray histogram).
